

Efficiency @ Southwell School

Using Hapara-Teacher Dashboard with Google Apps

Imagine being able to carry around the exercise books from all the students in your class so you can check on them anytime, anywhere. Imagine being able to jot down feedback, ask questions and mark a piece of writing-anytime anywhere. Imagine being able to check just what kind of messages are being fired off from the students' email accounts. Hapara (Teacher Dashboard) enables each teacher or School leader to do just that.

Teacher Dashboard is an add-on for Google Apps- to the uninitiated that's gmail, google docs, google sites, calenders. It allows you to have a one page overview of a class's google docs and gmail. This allows for

- Instant anytime/anywhere access.
- Promotes safe internet usage.
- Allows efficient cataloguing and tracking of online material used in google apps.
- Allows parent access to student learning.

To learn more visit the website below or talk to your resident techie expert-they may well have heard of this already.
